- ☒ the international application in the language in which it was filed
☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.5(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
☐ filed together with the international application in electronic form.
☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

Form PCT/ISA/237 (Box No. I) (April 2005)

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/IL06/00505

Box No. V Reasoned statement under Rule 43 *bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Claims 1-43 YES

Claims NONE NO

Inventive step (IS)

Claims 1-43 YES

Claims NONE NO

Industrial applicability (IA)

Claims 1-43 YES

Claims NONE NO

2. Citations and explanations:

Claims 1-43 lack novelty under PCT Article 33(2) as being anticipated by Patent No: US 6,983,320 B1 (Thomas et al).

Thomas discloses a collector for collecting attitude-data in relation to a predetermined subject from at least one pre-selected web site, said attitude-data containing attitudes in relation to said predetermined subject [col 8, line 13], a processor associated with said collector for processing said attitude data so as to generate an attitude analysis [col 12, line 56], an outputter associated with said processor for outputting said attitude analysis, thereby to provide an indication of attitudes being expressed in said web content in relation to said predetermined subject [col 2, line 63]

Claims 1-43 meet the criteria set out in PCT Article 33(4) because the claimed invention relates to the field of search engines for performing online monitoring activities.
